

WHY TOPSHIELD?

ZERO WASTE

Pot-life up to 30 days permits to stop working and save the remaining coating for the following session.

Good for you, good for the environment.

Excellent adhesion even on non-previously sandblasted surfaces (ASTM D3359-2).

Save time and upgrade your final outcome by choosing the easiest descaling and degreasing treatment cycle with TopCleaner and TopCleaner EP.

UP TO
450°C
without signs of delamination

suitable for components subject to thermal stress (long & short arms)

OUTSTANDING PERFORMANCES with a single-layer of only 15 µm

- ◆ High resistance to scratches and abrasion (ISO 15184 / ASTM D4060)
- ◆ Over 250 hours of salt spray chamber without chemical pre-treatment (ASTM B117 / ISO 9227)
- ◆ Fuel, lubricant and aggressive liquid immunity (ASTM D4060 / MIL-P-48699)

ALL-ROUND CUSTOMER CARE

Faster product industrialisation and easier painting plant optimisation thanks to a timely and continuous technical assistance on site.

Products of TopShield lines are rigorously certified accordingly to the most recent European legislation about environment, transport of hazardous components, safety and health of operators and they come along with a constantly updated documentation.

COLOR CHART

ABOUT TOPSHIELD

TopShield products are high performance ceramic-PTFE coatings that guarantee superior resistance and protection for every surface of the Military & LE equipment.

The two-component formula increases product stability and durability, ensuring excellent performances in the most severe environments.

TOPSHIELD LINES

TopShield 2K

Suitable for every metallic component of the Military & LE equipment, even if it is subject to thermal stress (up to 450°)

TopShield 2K Titanium

Undestroyable layer of protection thanks to the revolutionary titanium nanoparticle structures in the chemical formula

TopShield 2K LT

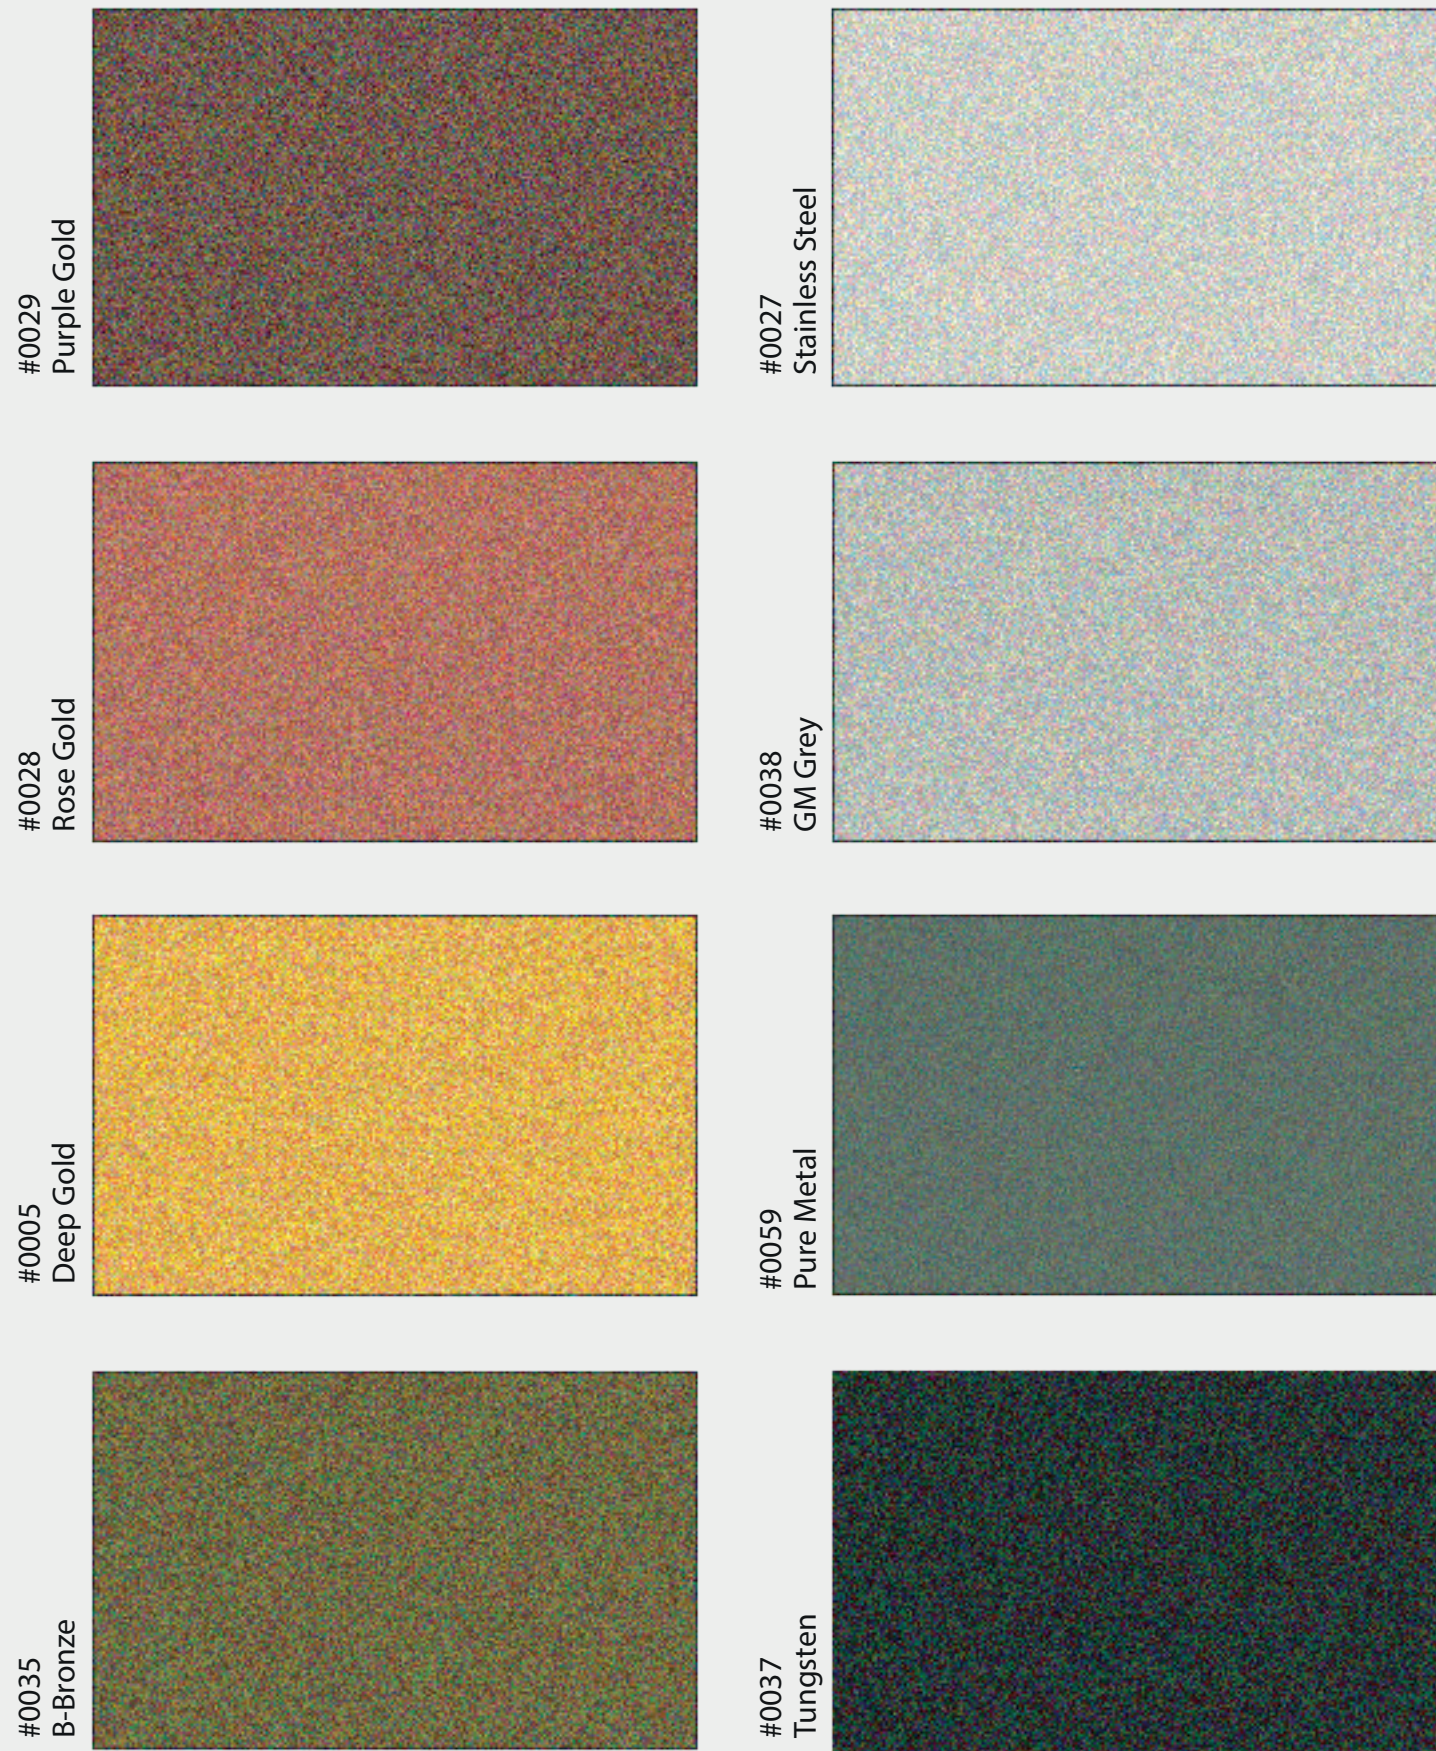

Excellent adhesion on polymeric surfaces - ideal to obtain the same tint on the entire weapon or accessory

TopShield 2K IR

Shielding technology specifically designed for Military & Law Enforcement segment to efficiently manage the visual and near-infrared signature on weapons and accessories
